Lampeter .. .	12 27	—

At Talsarn Halt the Level Crossing is provided with gates closing across the Railway and these gates are kept closed across the Line until required to be opened for the passage of trains. All trains must stop dead before fouling the crossing, unless signalled to pass over it by the person in charge. For the present Guards of trains must open and close the gates for trains to pass. The keys to be obtained from the Signaller at Lampeter before leaving there on the forward journey, to be handed back to him again on arrival of the return train at Lampeter.

Ystrad.—Small gates have been provided at this place, but will only be closed across the Railway during the night and on Sundays when Line is closed.

The other crossings named are provided with Cattle Guards and a white post is fixed alongside the Railway, at a distance of 300 yards on each side of the crossing. Trains and engines must not exceed a speed of 10 miles per hour, between each notice board and the crossing, and must be prepared to stop dead before fouling each crossing. The figure "10" appears on each post as an indication of this speed restriction.
